

VISIONAIRE, INC.

7115 Heavy Duty **Hydraulic** Driven Air Conditioner/Heater

The 7115 is a versatile self-contained hydraulic drive air conditioning/heating platform built to withstand mechanical abuse and harsh conditions. The system is easily configured to meet multiple mounting and cooling/heating requirements. The 7115 can be installed on a cabin wall or deck mounted and ducted to the cabin. Coolant or diesel heat options are available.

Call **866.838.2810** To Discuss Your Application

Specifications:

Cooling Capacity: 18,000 BTU/HR
Heating Capacity: Varies
Air Flow: 200 CFM (3 Speed Blower)
Standard Hydraulic Flow: 8 gpm
Refrigerant: R134a (**Pre-Charged**)
Plenum with Duct Options
3/16in Aluminum Chassis
30A @ 12VDC
15A @ 24VDC
Weight: 160 lbs
Dims: 24.5 W x 21.25 D x 21 T

Options:

Engine Drive Compressor
Left Or Right Hand Condenser Fan
Fresh Air Pressurization
Remotely Located Controls
Ducting Kits
Integrated Diesel Heat
Engine Coolant Heat
